Summary

Final-year B.Tech Computer Science student with a strong foundation in **Data Analysis, SQL, Python, DBMS, and Statistics**. Proficient in **Microsoft Excel, Power BI, Tableau, and Data Visualization techniques**. Currently pursuing the **Google Data Analytics Professional Certificate** and passionate about transforming raw data into actionable business insights through dashboard development, KPI reporting, and analytical problem-solving. Possesses strong communication, collaboration, and continuous learning abilities.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript

Data Analytics & BI: Microsoft Excel, Power BI, Tableau, Data Cleaning, Data Visualization, Dashboard Development, KPI Reporting

Databases: MySQL, MongoDB, DBMS

Web Technologies: React.js, HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems

Tools & Platforms: Git, GitHub, VS Code, Linux, Jupyter Notebook, Canva, Figma

Education

Meghnad Saha Institute of Technology, Kolkata 2026
B.Tech in Computer Science and Engineering GPA: 7.6/10

Parul Ramakrishna Sarada High School 2022
Class XII (WBCHSE) Percentage: 71%

Parul Ramakrishna Sarada High School 2020
Class X (WBBSE) Percentage: 86.43%

Projects

Atmos - Air Quality Intelligence Platform (Live Demo) React, FastAPI, Python, Tailwind CSS

- Developed a full-stack air quality monitoring platform using React and FastAPI to visualize real-time AQI and pollutant data.
- Integrated REST APIs with Axios and React Query to build responsive dashboards with interactive charts and forecasts.

Netflix Content Analytics Dashboard (GitHub) Python, Power BI, Pandas, Plotly, Jupyter Notebook

- Built an interactive analytics dashboard to examine Netflix's content trends, genre distribution, and regional growth using Python and Power BI.
- Implemented data cleaning, visualization, and business intelligence techniques to generate actionable insights and support data-driven recommendations.

Sales Analytics & Business Intelligence Dashboard (GitHub) Power BI, SQL, Python, Excel, DAX

- Built a comprehensive analytics dashboard to evaluate sales performance, customer behavior, and profitability trends using SQL and Power BI.
- Performed data cleaning, KPI analysis, forecasting, and business reporting to derive actionable insights and improve strategic decision-making.

Certifications

- Google Data Analytics Professional Certificate – Google (Coursera) *(In Progress)*
- Advanced Python with Data Visualization – National Institute for Industrial Training (NIIT)
- SQL (Basic) Certification – HackerRank
